## Election/Restriction

Page 2

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 29-48, drawn to a semiconductor device, classified in class 257, subclass 758.
  - II. Claims 1-25, 49-79, drawn to a method of making semiconductor devices, classified in class 438, subclass 1+.
- 2. The inventions are distinct, each from the other because of the following reasons: Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case unpatentability of the group I invention would not necessarily imply unpatentability of the group II invention, since the device of the group I invention could be made by processes materially different from those of the group II invention, for example, by growing and insulting/passivation later instead of depositing.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, the fields of search are not co-

Art Unit:

2815

extensive and separate examination would be required, restriction for examination purposes as

indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an

election of the invention to be examined even though the requirement be traversed (37

CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the

inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently

named inventors is no longer an inventor of at least one claim remaining in the application. Any

amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the

fee required under 37 CFR 1.17(I).

Any inquiry concerning this communication should be directed to the Group Receptionist

at telephone number (703) 308-0956.
